To whom it may concern:

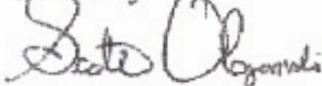

In search of a digital sign, I canvassed many of Global Signs competitors. I chose Global Signs because their price was on the lower side of the spectrum while the overall quality and warranty was far above. Also, Jarett was extremely knowledgeable on his products and his competitors products which made our meetings during the initial purchase very efficient and informative.

After placing the order with Jarett, The sign was installed and operational within 30 days. The installation was not sub-contracted like many of his competitors. Jarett was on-site during the installation, verifying our complete satisfaction was attained. The service from the installation to training was exceptional.

Originally, I was apprehensive with the expense verse profitability of a digital sign. One day after the sign was installed, I became a true believer of not only the draw of the sign but also how it changed the overall image of my business. In two weeks I attracted well over twenty new customers.

If I were to purchase another sign today, I would look no farther than Global Signs.

Sincerely

Scott Olszanski
