The recent addition of our electronic marquee by Global Sign has been a god-send! Not only has it allowed me to display all of our various menu items every three minutes, it also allows me to advertise specials and current events (such as banquets).

The electronic marquee has also boosted our sales, the first day that the sign was functioning, our sales increased by 50%. While this hasn't been the trend overall, we have seen a conservative daily increase of 10%.

The time that I save with the electronic marquee is impressive as well; to completely revamp the marquee's messages (20 messages or more) takes ten minutes, to add one message takes 30 seconds.

Not only do I save time by not having to sort through various letters to get the message across, I don't have to go out in inclement weather to change the sign (or risk getting hurt climbing a ladder).

I would gladly recommend Global Signs and their products to anyone.

The service that the company provides, along with the simplicity, multiple usages of the systems make it a definite that I would use them for any future needs!

Adam Burick, General Manager Tuscany Square Ristorante
